

Stream No. 33 (2 notices)

Garden Cove

The south stream is glacier.

Width: 30 feet

Depth: 5 inches.

No fish in stream, but about 300 fish in and around another small one and the mouth of the large stream.

North stream at head 12 feet wide 6 inches deep, but there are no fish in it above mean high tide line. There are several small issues where there are some fish but only a few.

Aug. 14, 1925: 1,000 fish all told

Aug. 26, 1926: 3,300 fish

Sept. 10, 1927: 6,120 fish

Stream No. 34 (2 notices)

Head Port Etches

Width: 40 feet

Depth: 8 inches

Accessible more than 2 miles and fish are up that far.

Has a greenstone gravel bottom, and wide bed. Comes in at center of head.

No stream in N. E. corner.

Another good-sized stream comes in at S.E. corner, but the fish are only a short distance up it. Part glacier water. Several minor issues around center stream and numerous ponds with fish in them.

Aug. 14, 1925: 10,000 fish (did not go as far upstream as in 1926; there may have been more fish)

Aug. 27, 1926: 23,000 fish all told, allowing 1/3 dead.

Sept. 9, 1927: 15,300 fish, 300 being silvers.

Stream No. 35 (2 notices)

Constantine Harbor

Width: 100 feet (Measured at mean high tide mouth, and

Depth: 6 inches (varies from that to about 40 feet wide and deeper.

Accessible about 2 miles and fish up that far. At that distance stream breaks up into several parts in a flat, open country. Has a fine gravel bottom for 1 mile, then coarser, then fine again.

Aug. 14, 1925: 40,000 fish

Aug. 27, 1926: 36,000 fish

Sept. 10, 1927: 31,000 fish
